

Japan-IAEA Joint Nuclear Energy Management School

9 to 26 June, 2014

at University of Tokyo and Tokai-mura, Japan

Certificate Course

Three reasons for attending this school

1. The school curriculum covers the most important topics related to the nuclear energy sector.
2. The faculty of internationally recognized experts is unrivalled in the nuclear world. You are guaranteed to be learning from some of the finest minds in the field.
3. It is a unique opportunity to broaden your horizons and meet people interested in nuclear energy from all over the world.

The Japan-IAEA Joint Nuclear Energy Management School is organized by Japan Nuclear Human Resource Development Network (JN-HRD.net), the Japan Atomic Energy Agency (JAEA), the University of Tokyo, the Japan Atomic Industrial Forum (JAIF) and JAIF International Cooperation Center (JIICC) in cooperation with the IAEA.

The purpose of this school is to provide an international educational experience aimed at building future leadership to manage nuclear energy programmes to young professionals from newcomer countries and countries with established nuclear programmes.

At the school, participants will gain awareness of the most recent developments in nuclear energy related to the peaceful use and knowledge such as energy policy, economics, nuclear safety and security, radiation risk management, and knowledge management. On the campus of the University of Tokyo, experts from the IAEA, Japan and established world specialists deliver lectures. Participants will be given valuable opportunities to visit NPPs, manufacturers, advanced research reactors and training facilities.

All participants will be expected to be actively involved in discussions.

Participation

Young professionals (preferably less than 40 years old) with managerial potential.

The school mainly targets; Bangladesh, China, Czech Republic, United Kingdom, Finland, Hungary, Indonesia, Japan, Kazakhstan, Republic of Korea, Lithuania, Malaysia, Poland, Saudi Arabia, Thailand, Turkey, United Arab Emirates, Viet Nam, South Africa and so on.

The programme is suitable for policy makers, employees of NPPs, R&D organizations, utilities, regulators, suppliers, education and training organizations.

Further information about application and the programme will be posted on our website <http://www.nuclear.jp/nem2014/>.
