

**9th International Training Course for the IAEA International Safety Standards
at Tokai University (hybrid)
[Participants Recruitment Information]**

December, 2023
Tokai University

Tokai University will hold the following 9th International Training Course for the IAEA International Safety Standards at Tokai University based on the "Cooperation Agreement on Nuclear Safety Education between Tokai University and the International Atomic Energy Agency (IAEA)". The international training course this year will be held in a hybrid system with both in-person and online as the following conditions.

At this time in addition to having the IAEA's lectures on the latest trends in IAEA safety standards, we will have related lectures given by the Nuclear Regulatory Agency of Japan (NRA), and Tokai University.

We look forward to the participation of many people from universities, companies, research organizations, embassies, etc. At the end of this course, participants will be given a certificate.
